40c

HANSEN BUSH CHERRIES ..... 1.00  
3/4 ft,

CHOKE CHERRIES ..... 1.25  
2/3 ft.

## Let's Go Organic

Due to the short growing season, the low average rainfall and the low humidity, our soil here in Colorado, suffers from a lack of organic matter. We recommend the addition of  $\frac{1}{4}$  peat and  $\frac{1}{4}$  compost, to the top soil used to back fill around transplanted nursery stock.

For your convenience we have ground peat at \$1.00 and good compost at \$1.50 a bushel. The compost is **FORTIFIED** with superphosphate and ammoniam sulphate.

We have an experienced crew of men for tree maintenance. This includes trimming, cabling, bracing, cavity work, transplanting, spraying and removal.

### OUR GUARANTEE

We give a 50% replacement on mortality guarantee. All retail sales are made subject to replace at  $\frac{1}{2}$  price on items failing to survive first growing season; if given reasonable care.

We furnish general planting instructions as recommended by Colorado-Nursery-men's Association, with each purchase and have more detailed planting instructions on fruit trees, grapes and on orchard care and maintenance.

We would like to call attention to the fact that our stock has been inspected and certified free of insects and we urge you to read and follow instructions on spraying and keeping your nursery stock healthy.

Buy Colorado-grown Nursery Stock. Our mile-high climate produces better root systems and hardier growth. However, due to the shortness of the growing season, it is not considered practical to graft ornamental and fruit tree stock here. The larger sizes of the grafted stock listed herein have been hardened to the Colorado climate for a season or more.

We have licensed, insured men for planting, transplanting and landscaping your home grounds.
